

EXPERIENCE

Software Engineer, Sony

JAN. 2024 - PRESENT

- Led development of BACH, a platform that allows media teams to provision promotional content to over 8 million TVs worldwide.
- Increased the managed device base of Sony's global TV update distributor by 25% by engineering backwards-compatible support for legacy TV models.
- Built SSO login with OAuth, AzureAD JWT and AWS Cognito, ensuring seamless auth. across internal tools.
- Built user-facing UIs with Vue & TypeScript and architected REST APIs with Go & PostgreSQL.
- Extensively leveraged AWS CDK and GitHub Actions to deploy resilient infrastructure at enterprise scale.

Software Engineer Intern, Sony

JULY 2023 - DEC. 2023

- Built in-house URL redirect service with Python & AWS CDK and integrated it to a Splunk dashboard, allowing devs to view aggregated analytics for customer QR code scans across TVs, Best Buy showcases, manuals, etc.
- Established CI/CD pipelines with automated testing strategies and manual approval stages to ensure quality.
- Developed and maintained unit and integration tests, strengthening system reliability.

Computer Science Tutor, UCSD

JAN. 2023 - JUNE 2023

- Tutored >200 students on Java, object-oriented design patterns, unit testing, and team software dev. concepts (e.g. Agile, Git, CI/CD) for CSE 110 Software Development. Achieved 100% student recommendation rate.
- Tutored >250 students on algorithms, data structures, dynamic programming, and time complexity analysis for CSE 101 Algorithm Design & Analysis. Achieved 100% student recommendation rate.

Undergraduate Researcher, École Polytechnique

SEPT. 2022 - DEC. 2022

- Conducted networking research, specifically into heterogeneous networks and optimization techniques.

Software Engineer Intern, KSDT

OCT. 2021 - SEPT. 2022

- Created React web app that provided an authenticated platform for users to easily book and schedule rooms in KSDT. Used MongoDB/Express/React.js/Node.js stack.
- Streamlined devops by introducing Agile methodologies with tools like Jira, Trello, and Notion.

EDUCATION

University of California, San Diego

SEPT. 2019 - JUNE 2023

- B.S. in Computer Science. Graduated *cum laude* (GPA: **3.85/4.0**).

SELECTED PROJECTS

Labyrinth - Accessible Navigator

- Winner of IEEE's 'Most Technical' award at their UCSD WI22 project showcase.
- Developed mobile app with Java and Android Studio that live-converts navigational directions into a series of coded device vibrations for the user. Created due to user accessibility concerns with existing navigation apps.

Easy Street - Shopping with Visual Discovery

- Built Chrome extension that transforms online shopping by using visual discovery to collate together visually similar products that the user can filter and sort on price, size, color, and more.
- Used React to develop UI, JavaScript for content scripts, Python for Flask API and AI image processing.

TOOLS

- **Programming Languages:** TypeScript, Go, JavaScript, Java, Python, HTML, CSS, SQL
- **Frameworks/Databases:** Vue.js, React, Node.js, Flask, S3, PostgreSQL, MySQL, DynamoDB, MongoDB
- **Tools:** Git, GitHub, AWS, AWS CDK, Docker, Splunk, Linux/UNIX, Claude

SKILLS

- **Skills:** Full-stack software development, system design, data structures & algorithms, networking, AI, infrastructure as code (IaC), microservices, containerization, CI/CD, unit testing, SQL/NoSQL DBs, Agile
- **Languages:** English, Mandarin, French
